I am proud that one of the first endorsements of my campaign for District Attorney was by the Upper Cape Women's Coalition.

Women deserve a District Attorney who will protect their right to make personal decisions about reproduction and their own bodies, including the right to an abortion.

In the event that a national abortion ban is passed following the 2024 election, I pledge that as District Attorney I will never prosecute someone for seeking or getting an abortion.

I will use my legal discretion and not prosecute anyone for seeking or getting an abortion, providing abortion care, or information. I call upon my opponent to do the same for the health of all.
